To the Trade.

We take pleasure in presenting our new price list. It contains many new articles and, we think, as large and varied a line of Prescription Ware as will be found in the country.

Discounts. Most of the prices herein are subject to discount, which will be named on application, together with special prices on the articles for which no prices are given. Discounts, when named generally, are intended to apply principally to Druggists' Glassware, as many of the other articles are subject to special discounts, as, for instance, Homœopathic Vials, Nursing Bottles, Screw Cap Ointment Pots, etc., etc.

Terms. Payments in exchange on New York or Philadelphia. Where parties are strangers to us, orders should be accompanied with cash or satisfactory references.

Shipments. If customers desire goods to come by any special route, it should be mentioned in ordering. Otherwise, we will make the choice of routes. Our factories being located in such a manner that we have the advantage of both railroad and water communication, we are enabled to obtain special rates of freight to all parts of the United States.

We pack our goods carefully and ship in merchantable condition, and our responsibility ceases with signing of the shipping receipt in good order. If goods arrive in bad order or there is evidence of breakage, customers should refuse to accept them from Transportation Lines unless the Lines accept receipt in bad order, and subject to claim for damage. Claims for missing packages, overcharges in freight, or excessive breakage, should be made to the Transportation Companies.

Insurance. We do not effect Insurance unless specially instructed, and then at custo

Orders for Summer Stock.

As no glass is made during summer, on account of the he is essential that customers sh send in their orders before May 1st, for all they will require to last until the fall—the g can then be made up and shipped in the spring and summer. By ordering early, prices are secured with the certainty of having bottles to use when they a. e wante

Plain Stock Ware.

We carry in our ware sheds at all times a large assorted stock of Plain Drug Ware in Green and Flint Glass, and of such other articles as are in constant demand. We can ship such goods as these on short notice.

Lettered Ware.

Lettered Ware is made either in a private mould or from an engraved name plate. We have a general assortment of plate moulds for the latter purpose, which will be found noted in the catalogue.

We cannot make less than an original package of any size Lettered Ware, and the contents may be a little more or less than the quantities desired, as it is impossible when blowing to foresee the number which will be fit to pack, as we select our ware very carefully, rejecting whatever is not a good merchantable article.

Private Mould Ware.

The superior quality of the glass made in our patent furnaces, combined with the careful attention we give to the manufacture of private mould bottles, has brought to our factories the orders of many of the largest consumers of bottle ware in the United States and British Provinces. We are always pleased to furnish special quotations on receipt of samples and memorandum of quantities wanted, or to assist customers in getting out any new designs they may desire for either moulds or plates.

Orders Promptly Filled.

The capacity of our factories is so large that we are enabled to fill promptly almost any order; and having factories at so many different points, should any unforeseen accident occur at one place we can make the goods

Color.

Any ware on the list can be furnished in either Flint, *Flint-Green*, Green, or Amber Glass, except where specially noted otherwise.

FLINT.

Our Flint is being largely used by most of the leading Wholesale and Retail Druggists through the United States to their entire satisfaction.

FLINT-GREEN.

Our *Flint-Green* is the lightest shade of green made in this country, and is unequaled for brilliancy, besides being tougher and stronger in texture than most glass. It is largely used in place of flint glass by many parties at a considerable saving in cost. After years of experimenting, and at great outlay of money, we have succeeded in producing this color, and its use is constantly extending.

GREEN.

We can also supply the ordinary green glass such as is generally manufactured, if customers so desire.

AMBER.

Our Amber is a rich medium shade, and secures a preference wherever it has once been used. It also possesses the advantage of uniformity in shade, a quality that is only secured by our "New Process" of manufacturing glass.

Order by Mould Numbers.

Please be careful in all cases to give number of mould when any particular bottle is desired.

Weight and Capacity.

The capacities given in this price list are average Fluid Capacities, and are based on the standard average weights. We can of course make bottles heavier if desired, but it will slightly decrease the capacity, and an additional charge will have to be made, proportionate to the increased weight.

Be Specific in Ordering.

In ordering Glassware, buyers will please state what color they want, and specify particularly style of bottle, giving number of mould, and finish desired (see page 12); and if ware is wanted lettered from private or plate moulds, send sketch showing exactly the lettering desired.

Illustrations.

The illustrations in this catalogue are simply to represent shape of bottles, not relative or proportionate sizes.

Trade Opinions.

We will be pleased to furnish to any who may desire, testimonials as to quality of our goods from customers who have been using them for a series of years.

The "Dixie" Panels—Green Glass.

Dixie Panel.

These are an entirely new line of Panels, and being taller and flatter than the ordinary panels are larger in appearance than the ordinary panels of corresponding capacity.

They are paneled on four sides, one panel being oval and plated for the purpose of lettering.

Paper Bottles.

No. 13.

We have recently added to our business the manufacture o Paper Bottles under Letters Patent.

To a large class of trade these goods are well known and requi no introduction or recommendation; but as we are sending our cata logue to many who have never used them, we call your attention t the following:

Paper Bottles are specially adapted for Inks, Mucilage, Liqui Glue, Shoe Dressing, Bluing, Stove Polish and kindred articles.

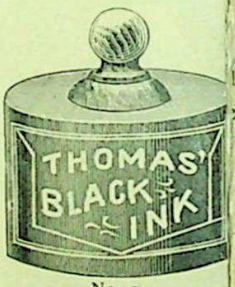
They only weigh about one-third as much as glass, saving i cost of freight both when empty and filled. They are thus we adapted for export trade, where duties are levied according to th gross weight of packages.

No packing material is required in shipping, either before o after filling; hence the new bottles from the manufacturer require n cleaning, and the cost of this, as well as the cost of the packin material is saved to the user.

They are non-breakable in regular use, and are not affected by freezing weathe or sudden changes of temperature.

The bottles being entirely covered with labels, and having the tops enamele present an attractive appearance.

Where parties have their labels prepared and send them to us, we will attach the labels without extra charge, providing the order is sufficiently large to warrant it, thus saving the customer this labor and expense; and when the bottles reach the user, they are already labeled and ready for filling.



No. 1.

When the bottles are not intended to be labeled, they are covered with a dark bronze paper; but when labeled, the label covers the entire sides.

We have greatly improved the manufacture of these goods and are constantly adding to the articles we make regularly. Our facilities will b kept ample for promptly supplying the rapidly growing trade in these goods.

The Stoppers for Paper Bottles are made of cork with wooden tops. We ca furnish stoppers for any of the bottles, but *the prices made are always withou stoppers*, unless specially mentioned otherwise.

No. 3.

The sunken tops which we make on some of these bottle prevent the drippings from running down the outside.

All can be furnished with metal pourout mouths, if desired but this should be stated in ordering or asking for quotation.

We can furnish these Paper Bottles of any special size or shap desired, as well as the sizes named herein.
